

Deliverable A1-2

Review of EU and national legislation in the criteria for acceptance of wastes in municipal landfills

This Deliverable constitutes product of the preparatory Action A1 Review of EU legislation and materials requirements for landfills construction and restoration.

This report presents the requirements of Greek and European legislation in regard to the management of solid waste with emphasis on classification and disposal in landfills.

Initially, the National legislation about the management of solid waste, particularly with regard to classification and disposal in landfills are recorded. Then, a review about the European directives and decisions of the European Council on the management of solid waste and the harmonization of them with National legislation is presented.

Subsequently is presented the Framework for Waste Production and Management.

Also, the classification of wastes on the basis of the European Waste Catalog and the hazardous properties of wastes are referred to in detail.

Finally, the criteria and procedures for acceptance of waste in landfills of non-hazardous and hazardous waste are listed.
