

Deliverable C1-3

Project monitoring and LIFE Project Specific Indicators Table sent in with Mid-term Report

Within the framework of LIFE DIANA, specific key performance indicators (KPIs) have been determined at the beginning of the project, at the end of the project and 3 years beyond the project's end. These indicators include the environmental, economic and communication / dissemination / awareness project's characteristics. These indicators are measured and calculated throughout the project's duration in order to monitor project's progress as regards to the targets and objectives that have been initially set. The indicators values until 15/10/2019 are presented in this deliverable. In more details, as both pilots have been recently installed and under in operation for no longer than one-month solid outcomes regarding the environmental and technical indicators cannot be held at this reporting period. However, communication and dissemination activities are ongoing and the relative indicators have been measured accordingly.
